

flexx-IPC® EasyLabel

Using flexx-IPC® *EasyLabel* templates makes it easy to customise the look of your flexx-IPC® frontpanel. *EasyLabel* templates enable you to print your own key labels on any laser printer.

STEP 1: DOWNLOAD THE TEMPLATES

In the download area of www.flexx-ipc.com you can select the required flexx-IPC® *EasyLabel* template that you need. The Microsoft Excel® templates are made for use with any standard Office software.

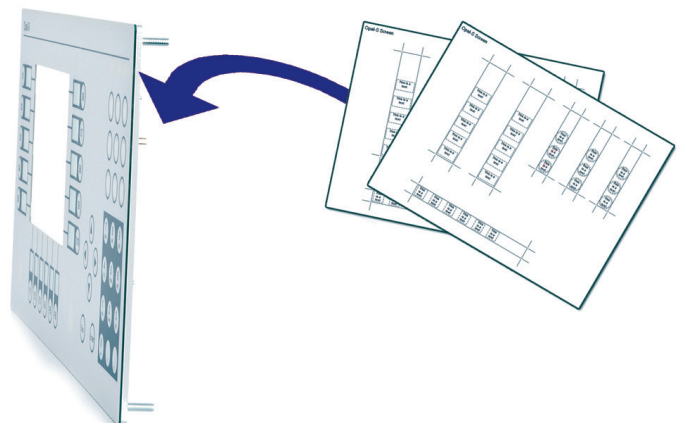

STEP 2: PRINT THE LABELS

Each flexx-IPC® *EasyLabel* template can be designed individually, inserting graphics, signs or numbers within the provided key fields. If you plan not to use certain keys on your flexx-IPC® panel PC, simply leave that key field blank within the template. Print the final design using a laser printer on a suitable white foil. One foil for your first design you will find within the by-pack kit of your system. Additional foils you can order using the web-shop.

Designfoil, Order-Nr.: 62004166

STEP 3: CUSTOMISE YOUR SYSTEM

After the labels have been printed, you can cut them along the provided lines and simply slide them into the slide-in pockets on the back of your flexx-IPC® panel PC.

flexx-IPC® EasyLabel - Customisation made easy!
